

Replacing Diesel with Solar

A Complete Guide to Installing Solar PV for Backup Power

*This e-book provides representative sample content to assist a reader in evaluating the
Replacing Diesel with Solar Report*

List of Contents

1. Captive Power in India

- 1.1 Introduction
- 1.2 Captive Power Plants in India
- 1.3 Why Solar for Captive Power
 - 1.3.1 The Business case for CPP Using SPV
- 1.4 Attractive Market Segments
 - 1.4.1 Large Industrial Facilities
 - 1.4.2 Large Commercial Buildings/Facilities
 - 1.4.3 Communication Sectors
 - 1.4.4 Water Pumping
 - 1.4.5 On-shore and Off-shore Oil & Gas
 - 1.4.6 Desalination
 - 1.4.7 Remote Monitoring Stations
 - 1.4.8 Warning Signals
 - 1.4.9 Cathodic Protection
 - 1.4.10 Lighting
 - 1.4.11 Direct-Drive Applications
 - 1.4.12 Refrigeration
- 1.5 Solar Power Vs Diesel Generator
- 1.6 Key Bottlenecks

2. Technology Options

- 2.1 Introduction
- 2.2 Stand Alone PV systems
- 2.3 Grid-tied Captive Power Plant
 - 2.3.1 Grid-Interactive Only (No Battery Backup)
 - 2.3.2 Grid-Interactive With Battery Backup
- 2.4 Hybrid System
 - 2.4.1 Solar Photovoltaic-Diesel Generator Hybrid System
 - 2.4.2 Solar Photovoltaic-Wind Hybrid System
- 2.5 Technology Option Prevalent In India and Future Trends

3. Setting up Solar CPP in India

- 3.1 Steps Involved in Setting a Captive PV Power Plant
- 3.2 Steps Involved in Setting up Hybrid System
- 3.3 Key Requirements to Set Up a Captive Power Plant
 - 3.3.1 Essential Components
 - 3.3.2 Optional Components
 - 3.3.3 Default Components

3.4 Key Factors to Consider

3.5 Indian Companies and Entities Involved in Setting up of a Captive Power Plant

4. Policies, Regulations & Incentives

4.1 Government Incentives and Policies

4.1.1 Captive SPV and the NSM

- Guidelines for Off grid and Decentralized Solar Applications
 - Central Financial Assistance & Eligibility
 - How to Apply
 - Application Fee
 - Commissioning of the Projects
 - Guidelines in Detail
- Wind-Solar Hybrid Systems

4.1.2 Electricity Act

- Provisions for Captive Power Plants in Electricity Act 2003
- Provisions for Captive Power Plants in National Electricity Policy
- Provisions for Captive Power Plants in Electricity Rules 2005

5. Economics of Captive Power Plants

5.1 Introduction

- Solar PV and Grid Parity
- Solar PV's Diesel Parity

5.2 Capital Costs and Breakups

- Cost Break up of A 100 Kw Solar Captive System – without Batteries
- Cost Break up of A 100 Kw Solar Captive System – with Batteries

5.3 Results of the Financial Model

5.4 Scenario Analysis

- Scenario Analysis for Financial Outputs for a Captive Solar PV System

6. Financing of Solar CPPs

6.1 Introduction

6.2 Project Finance

6.3 Asset Finance

6.4 Corporate Finance

6.5 Most Likely Routes for Financing of Solar PV CPP

6.6 Nodal Agencies that Support Renewable Energy Financing in India

6.6.1 IREDA

6.6.2 Power Finance Corporation Ltd

6.7 Financial Institutions that Fund RE Projects in India

7. Next Steps to be taken by a Solar PV Captive Power Developer

7.1 Introduction

7.2 Preparing Prefeasibility and Detailed Project Reports

7.3 Meeting Government Departments

7.3.1 Lists and Contact Details of Government Departments (SNA) in Various States

7.3.2 Central Government Relevant Department Details and Contacts

7.3.3 Other Associations for Solar Energy in India

7.4 List of Integrators of Solar PV Captive Power System

8. Solar PV in India – Industry Status and Trends

8.1 Introduction

8.1.1 Introduction to Alternative Energy Sources

8.2 Solar PV Technology

8.2.1 Solar PV – Crystalline Solar Cells

8.2.2 Solar PV – Thin Film Solar Cells

8.2.3 Solar PV - Concentrating Photovoltaic

8.3 Solar PV Market Status and Trends

8.3.1 Market Share of Thin Film Photovoltaics

8.3.2 Solar Photovoltaic in India – A Snapshot

8.4 Solar Energy Potential in India

8.4.1 Regional Potential for Solar Power

8.4.2 Current Solar PV Scenario in India

8.4.3 Future Solar PV Scenario

8.4.4 Solar PV Future Contribution in Indian Electricity Supply

8.5 Status of Solar PV Technology in India

8.5.1 Solar Cells and Solar PV Production

8.5.2 Foreign Trade of Solar PV

8.6 Prominent Solar PV Power Projects & Companies in India

8.6.1 Solar PV Power Projects Installed

8.6.2 Proposed Solar PV Projects

8.6.3 Solar PV Projects in India – News and Updates

8.7. Key Challenges to Growth of Solar PV in India

8.8 Brief Highlights of Solar CSP and Solar Thermal for Heating and Drying

8.8.1 Solar CSP

8.8.2 Solar Thermal for Heating & Drying Purposes

9. Case Studies of Indian Use of Captive Solar PV

9.1 Captive Solar PV Systems – Experience of L&T, Chennai

9.2 Captive Solar PV Systems – Experience of SSN College of Engineering, Chennai

9.3 Stand-alone Solar PV Installation in India

List of Tables

Chapter 1

1. All India Captive Power Plants of Industry (1 MW and above)
2. Wind Power Plant Installed Capacity and Generation at Captive Power Facilities
3. Renewable Energy Installed Capacity and Generation by Industry Industry-wise Installed Capacity of Captive Power Plants (1 Mw & Above) in MW

Chapter 3

1. Comparison of PWM and MPPT charge controllers
2. Types of Batteries
3. Trackers and Sensors
4. Inverters

Chapter 4

1. Central Financial Assistance & Eligibility
2. Envisaged Deployment across the Application Segments
3. Other Off-grid Small Solar Thermal Systems
4. Wind-Solar Hybrid Systems

Chapter 5

1. Cost break up of a 100 kW solar captive system – without batteries
2. Cost break up of a 100 kW solar captive system – with batteries
3. Government subsidies
4. Costs and Financing Pattern
5. Performance of Solar PV System --
6. Results of the Financial Model
7. Summary of Returns from Cost Savings
8. Equity IRR, Project IRR, Equity Payback Period, Project Payback Period, for Different Capex and Diesel Price Escalations

Chapter 6

1. Project Debt Financing for Renewable Energy – Highlights
2. Financial Institutions that Fund RE Projects in India

Chapter 7

1. List and Contact Details of State Nodal Agencies (SNA) in Various States

2. Central Government Relevant Department Details and Contacts
3. Other Associations for Solar Energy in India

Chapter 8

1. Solar Photovoltaic in India – A Snapshot
2. The top 5 districts with the best solar irradiation in Gujarat
3. The top 5 districts with the best solar irradiation in Rajasthan
4. The top 5 districts with the best solar irradiation in Madhya Pradesh
5. Renewable Energy Installed Capacity in India
6. India: Projected Installed Capacity (GW)
7. India: Projected Installed Capacity (GW)
8. National Solar Mission Targets
9. India: Projection of Solar Electricity Generation Capacity under the Energy Revolution Scenario
10. India: Projection of Solar Electricity Generation Capacity under the Reference Scenario
11. Trends in Production of Solar PV Cells and Modules (MWp) in India
12. Application of Solar PV Cells (MW) in India – Sectorwise
13. Foreign Trade of Solar PV
14. Imports of Solar PV Cells
15. Exports of Solar PV Cells
16. Grid-tied Solar PV Power Projects Commissioned
17. 5 MW Solar PV Power Projects Approved by the Central Government under Phase I of NSM Scheme
18. Rooftop and Small Solar Power Plant Projects Registered for Generation Based Incentives under Phase I of NSM Scheme
19. Solar PV Power Projects Coming up in Gujarat
20. Developers Selected for Establishing Solar Power Projects by Rajasthan Government
21. Solar PV Project at Kolar
22. Highlights of Solar CSP

Chapter 9

1. List of SPV captive Power Installations in India

List of Figures

Chapter 2

Direct-coupled System
PV System with a Battery Bank
Grid-interactive PV System without Battery Backup
Grid-Interactive with Battery Backup
A Schematic of a Stand- alone Hybrid System
Solar Photovoltaic-Wind Hybrid System

Chapter 3

PV-hybrid System Block Diagram
PV-Generator Mix Plot for Omaha
Relationship between the Current and the Voltage during the 3 Phases of the Charge Cycle

Chapter 7

Next Steps to be taken by a Solar PV Captive Power Developer

Chapter 8

Classification of Energy Sources
Solar Energy Technology
Historical Evolution of Technology Market Share and Future Trends %
2010 and 2011 Regional PV Market size Forecasts
Thin-Film Vs. Crystalline Solar Panel Production
Annual mean daily global solar radiation in India
Solar irradiation data for Patan
Solar irradiation data for Jaisalmer
Solar irradiation data for Neemuch
Trends in Production of Solar PV Cells and Modules (MWp) in India

To Purchase the Replacing Diesel with Solar Report.....

Talk to Us Now

Sumukhi Sreevatsan

Mobile: **+91-99621-40666 (India)**

Email: Sumukhi@clixoo.com

Last updated: **May 2011**

Price: **Rs.29, 500**

Payment Options

Purchase it through credit card

Visit - <https://secure.clixoo.com/purchase/eai/capt/report.html>

Get it through cheque/DD

Cheque / DD in the name of Clixoo
Solutions Private Limited,

Send the cheque to:

Narasimhan Santhanam,
Clixoo Solutions Pvt., Ltd
A5C, Anugraha Apartments,
41, Nungambakkam High Road,
Chennai 600034
Tamilnadu; Ph: 044-45590142

Get it through bank wire transfer

EAI is part of Clixoo Solutions Pvt. Ltd (www.clixoo.com), a leader in providing sustainability solutions. Our various divisions have been critical catalysts for specific domains within cleantech – for instance, our EAI division is considered the thought leader for the Indian renewable energy sector, and our Oilgae division is considered to be the global leader for algae fuels business intelligence.

EAI

EAI is the foremost research and consulting company for the Indian renewable energy industry.

- We have a dedicated focus on the Indian renewable energy sector
- We are unique in our focus on market and strategy research for renewable energy
- Our team has assisted businesses large and small on a variety of renewable energy projects.
- Our expertise has been sought by Fortune 100 companies
- Our team comprises professionals from premier institutes such as the IITs and IIMs
- The cumulative wisdom of our team, derived from extensive research and hands-on consulting, has provided us with deep insights about the industry which few, if any, have.
